

Cotswolds LEADER Case Study – Westend Office Suites

Towards the construction of 10 new high quality office units for start-ups and business seeking their first commercial premises or looking to expand. The project has enabled local firms to start-up and grow due to the facilities that would not otherwise be available. Within a few months of the units being completed all were let and by March 2017 two indirect jobs had been created by businesses renting the units. As at March 2018, 6 indirect jobs had been created and 14 new businesses supported. Business expansion continued in 2019 and indirect jobs are now in double figures.
